Aditya Aryan

Full Stack Developer | AI/ML Engineer | Cloud Engineer
aryanaditya275@gmail.com | +91 7542997803 | Triveniganj, Supaul, Bihar, India
LinkedIn | GitHub | Portfolio | HackerRank | Blog

Summary

Full Stack Developer with hands-on experience building Django and Flask web applications, RESTful APIs, and relational data models, backed by coursework in AI/ML and Cloud Computing. Active open-source contributor (NIST OSCAL compliance tooling) with a track record of shipping production-ready projects handling 5,000+ concurrent users.

Education

KIT College Of Engineering, Kolhapur — Kolhapur, Maharashtra, India
CSE (Artificial Intelligence and Machine Learning), B.Tech — September 2025 – Present
CGPA: 9.0

Indian Institute of Technology, Madras *(Online Degree Program)* — Chennai, Tamil Nadu
BS in Data Science and Applications — May 2025 – Present
CGPA: 8.25

Sainik School Kunjpura — Karnal, Haryana
Science, Higher Secondary Education — March 2017 – March 2024
Percentage: 70.6%

Skills

Languages:	Python, C, Rust
Frameworks:	Django, Flask, JavaScript, Tailwind CSS, Bootstrap
Tools / Platforms:	Git, GitHub, VS Code, Google Cloud, Google Workspace, WordPress
Databases:	MongoDB, SQL (SQLite/MySQL)

Projects / Open-Source

Django-Based E-Commerce Web Application | Link *Django, Python, SQLite/MySQL, HTML, CSS, Bootstrap*

- Architected a full-stack e-commerce platform in Django following MVC design, supporting product listing, cart, and checkout workflows
- Implemented secure user authentication, session management, and RESTful API endpoints for core application features
- Designed relational database schema and ORM models using SQLite/MySQL, ensuring data integrity across users, products, and orders
- Built a fully responsive UI with HTML, CSS, and Bootstrap, and integrated frontend-backend flow for dynamic data rendering

Meraki – Cultural Committee Platform | Link *TypeScript, JavaScript, HTML, CSS*

- Engineered and deployed the official website for KITCoEK's Cultural Committee, handling event content and user access
- Built and secured the authentication system, supporting 5,000+ users throughout the Meraki 2026 fest with reliable uptime
- Designed a responsive, cross-device UI in TypeScript/JavaScript, improving user engagement during peak event traffic

compliance-trestle (Open Source Contributor) **| Link** *Python, Shell, Makefile, Jinja, JavaScript*

- Contributed to compliance-trestle, an opinionated open-source platform for managing compliance-as-code via CI/CD, built on NIST's OSCAL standard
- Diagnosed and resolved a digital signature verification issue, improving document integrity checks in the compliance pipeline
- Collaborated with maintainers using a Git fork/branch/PR workflow, adhering to open-source contribution standards

CampusTrack (InOut-Register) | Link *Python, Flask, SQLAlchemy, SQLite*

- Developed a Flask-based attendance and in/out tracking system using the application factory pattern for a modular, scalable codebase
- Designed a blueprint-based architecture separating auth, admin, main, user, and superuser roles, implementing role-based access control (RBAC)
- Modeled relational schema and database operations with SQLAlchemy ORM and SQLite for structured attendance records
- Wrote automated tests to validate core functionality and documented setup, configuration, and system architecture

Experience

KITCoEK's Cultural Committee | Technical Team Kolhapur, Maharashtra, India | November 2025 – Present

- Built and maintain the committee's web platform (see Meraki project above) alongside registration and feedback form systems for participant management
- Coordinate with a cross-functional technical team to keep event pages and infrastructure operational during live events

IIT Madras's Pradox | Sponsorship Department Kolhapur, Maharashtra, India | November 2025 – June 2026

- Sourced and engaged potential sponsors through targeted outreach and business communication
- Negotiated sponsorship terms and coordinated event planning and financial logistics with the sponsorship team
- Strengthened relationship-building, negotiation, and cross-team collaboration skills in a fast-paced, deadline-driven environment

Achievements

- Solved 500+ difficult-level problems on **CodeChef**

Certifications

- **Google Cloud Deployment, Management and Skill Boost** – Google Cloud Skill Badge
- **Introduction to Security Principles in Cloud Computing** – Google Cloud Skill Badge

Languages

- Japanese – N5 Level (Learner)
- English – Professional Working Proficiency
- Hindi – Professional Working Proficiency
